EDUCATION

University of Virginia | Charlottesville, VA **Graduated May, 2026**

- B.A Computer Science, Minor in Data Science
  - *Relevant Coursework*: Software Engineering, Software Development Essentials, Data Science Systems, Programming Languages for Web Applications, Foundations of Machine Learning, Mobile App Development, Data Structures and Algorithms
  - *Organizations*: Women in Computing Sciences, Association for Women in Math, Chinese Student Association, Pickleball Club: Practice Chair

SKILLS

- *Programming/ Scripting Languages:* Java, Python, TypeScript, JavaScript, PHP, SQL, Kotlin, C, Go, HTML/CSS
- *Frameworks and Libraries*: React, Next.js, Django, Jetpack Compose, Tailwind CSS
- *Backend & Databases:* PostgreSQL, MySQL, Docker, Git, REST APIs
- *Platforms & CMS*: Vercel, WordPress, Elementor
- *Spoken Languages*: English (Native/ Fluent), Mandarin Chinese (Fluent)

PROJECTS

UVA Restroom Tracker App | Kotlin, Jetpack Compose, Firebase, Git

- Engineered a map-based Android application using Kotlin and Jetpack Compose, enabling users to pin locations, write descriptions, and rate facilities on cleanliness, accessibility, and amenity availability (e.g., feminine hygiene products).
- Integrated Firebase Authentication and Cloud Firestore to securely manage real-time, user-generated reviews, configuring database security rules and coordinating version control with a teammate.

UVA Trading App | Django, Python, HTML/CSS, PostgreSQL, Git, Heroku

- Engineered a full-stack peer-to-peer trading platform designed to help students exchange goods and reduce waste by using Django and PostgreSQL, adhering to Agile development methodologies to deliver iterative features.
- Built robust user workflows including secure authentication, real-time listing search, and filtering, leveraging server-side validation to enhance data security.
- Implemented secure messaging and dynamic media upload functionality, resulting in a reliable and high-engagement platform for sustainable campus reuse.

Fitness Tracker | JavaScript, HTML/CSS, PHP, Docker, PostgreSQL

- Developed a full-stack fitness tracking application using PHP, emphasizing secure data management through session-based authentication and cryptographic password hashing.
- Modeled a complex relational database schema with PostgreSQL, ensuring referential integrity and optimized data retrieval for user profiles and activity logs.

WORK EXPERIENCE

Web Developer | Timberline Team Consulting **June 2025 - August 2025, June 2026 - Present**

- Engineered and maintained high-availability web solutions for thirteen client properties, implementing automated smoke-testing protocols to ensure cross-device performance, accessibility compliance, and technical stability.
- Optimized application performance and search engine visibility by conducting technical audits with Semrush and Google Analytics, diagnosing performance bottlenecks, and executing data-driven remediation strategies.
- Collaborated cross-functionally in an Agile environment to build and deploy two full-stack e-commerce platforms, managing the development lifecycle from initial requirements gathering and wireframing to production-ready deployment.

Facilities Services Assistant | UVA Aquatic and Fitness Center **August 2024- May 2026**

- Provided customer service at the welcome desk by processing patron memberships and delivering information regarding facilities and services to over 2,000 gym-goers daily.
- Supported a team of 45 facility assistants and ensured a clean and safe fitness environment for members and guests.

Head Teaching Assistant | Nationwide Master Tutoring **June 2022- August 2024**

- Led a 5-person teaching assistant team to develop lesson plans, manage course administration, and deliver instructional lectures while providing individualized student support.
